About The Workshop

“Research is to see what everybody else has seen, and to think what nobody else has thought.”

RM-2016 This workshop is meant to familiarize aspiring researchers with basic tools of conducting action oriented research. The participants will be introduced to wide range of conceptual issues, and quantitative and qualitative methods of conducting research. By the end of the workshop, the participants are likely to have developed the skills to review the literature, develop hypotheses, frame research design, identify sampling techniques and comprehend the role and relevance of the tools for data collection and analysis. The two days workshop will expose the participants to a brief theoretical input followed by the field work based on syndicates.
